

Our Company

Mirage is manufactured with experience. We have been manufacturing a variety of aluminum building products for over 20 years. It takes years of learning, process development and continuous improvements to manufacture products that we believe are the best on the market for quality and design.

Versatility

Mirage retractable screens will make conventional door screens a thing of the past. The unique design allows the screens to retract and be virtually out of sight when not in use. Mirage door screens can be made to fit almost any door application, including in swing or out swing doors, patio doors, and entrance doors. Door heights up to 110" and door widths up to 55" are available.

Windows

The Mirage Screen system is ideal for use on windows. Mirage rolls away to offer an unobstructed view unlike conventional stationary window screens and virtually eliminates the need for cleaning.

Q-Base Quality

Over those 20 years, we have learned the value of customer satisfaction. Being certified on the Q-Base quality management systems has helped us to ensure that we are able to deliver you products of the highest quality and value. Q-Base is an international quality management system based on the ISO 9002 standard.

Mirage Limited Lifetime Warranty

The best warranty on the market. Mirage offers a one year warranty on parts and labour and a lifetime warranty on all parts for the roller screen (except the screen material) under normal wear and tear.

For more information, visit our website: www.miragerollerscreens.com or call our Product Information Line toll free at 1-800-667-2526.

Premium Components

Durable fiberglass screen material made to our specifications by PHIFER® world renowned for their dedication to quality.

Sunshades

Mirage window screens can also be used as a sunscreen. We use PHIFER® Solar/Insect Screen materials in place of our regular PHIFER® window and door insert screen. This material removes 65% of the heat generating rays, while still keeping out insects and offering excellent outward visibility.

Available Options

- ❖ Door Restrictor – Keeps your normal door from closing on windy days
- ❖ Slide Bolt Attachment – Holds static side of double screen allowing easy exit and entry
- ❖ Door Latch – can be used in place of / or with the standard magnetic latch.

Precision Engineering

- ❖ Stainless Steel Fasteners with painted screws to match our six standard colours
- ❖ Impact & UV resistant material used for all plastic parts
- ❖ Aluminum Housing – Low maintenance housing and pull bar with premium powder coating for optimum UV and salt spray resistance
- ❖ Door Handle – Unique door handle design for a comfortable and easy grip

Colours

In addition to our 6 standard colours, we offer 35 additional designer colours from our Diamond Series collection. We also custom match colours. You pick the colour, we'll match it. We use the highest quality powder coatings formulated to exceed one of the toughest paint standards in the industry for UV and salt spray resistance the AAMA 2603-98.

All of our Mirage roller screens are powder coated in-house by trained Mirage personnel. Absolutely no screens are sent elsewhere to be powder coated. This is especially important to ensure proper adhesion of the Aluminum parts on the roller screen. The Mirage warranty ensures you first time quality for a lifetime.
